

Have You Had Your Yearly Eye Exam?

**Jackson Memorial Jaguar
Band**

is participating in a fundraiser
in conjunction with
The Eye Center at Jackson

260 N County Line Rd., Jackson, NJ 08527
www.theeyecenteratjackson.com
732-730-EYES (3937)

Recommend someone for a comprehensive eye exam and/or to purchase glasses or contacts and the band will receive a portion of the proceeds.

Routine eye exams are important – regardless of your age or physical health. During a comprehensive eye exam, your eye doctor does much more than just determine your prescription for eyeglasses or contacts. He or she will also check your eyes for common diseases, assess how your eyes work together as a team, and evaluate your eyes as an indicator of your overall health.

**January – June
2016**

Help Us Raise \$10,000!

For each family member or friend that receives a comprehensive eye exam and/or purchases glasses or contacts, the Jaguar Band will receive a sizable portion of the proceeds.

- **Do you or anyone you know wear contacts or glasses?**

Have them purchase them at The Eye Center at Jackson and the Jaguar Band will receive **10%** of the proceeds!

If your family/friend purchases glasses

= \$20-50 approximate donation for each purchase

If your family/friend purchases contacts

= \$20-50 approximate donation for each purchase

- **Do you or anyone else in the family need a yearly eye exam?**

Two exams

= \$80 approximate donation

There is no limit! Your friends and family just have to mention the fundraiser and your name at check-in.

Why You Need Yearly Eye Exams

Regular eye tests are important because your eyes don't usually hurt when something is wrong. A sight test is a vital health check for your eyes that can pick up early signs of eye conditions before you're aware of any symptoms – many of which can be treated if found early enough.

Glaucoma caused by damage to the optic nerve

- Over *2.2 million* Americans have glaucoma but only half are aware.

Cataracts clouding of the eye

- By age 80 *more than half* of all Americans either have a cataract or have had cataract surgery

Diabetic Retinopathy appears in *80%* of people with diabetes. It is caused by damage to the blood vessels in the back of the eye.

- It is the leading cause of blindness for people aged *20-64*.

Macular Degeneration gradually affects central vision.

- As many as *11 million* people in the United States have some form of age-related macular degeneration. This number is expected to *double* by 2050.

Multiple Sclerosis symptoms include double vision, eye discomfort and uncontrollable rapid eye movements.

High-risk groups include: people over 60, family members of those already diagnosed, diabetics and people who are severely nearsighted.

An infant should receive his or her first eye exam between the ages of 6 months and 12 months.

1 in 4 school-aged children have vision problems and **11.5%** of teenagers have undetected or untreated vision problems. Often time these problems are mistaken for learning disabilities.

About *62%* of adults and *83%* of children visited the *dentist* last year but **less than 50% of adults and less than 30%** of children visited an eye doctor.
